FHOSS®

Headquartered in the UK, with an impressive and diverse blue-chip client list, FHOSS offers an award-winning range of unique safety and risk mitigation products, which dramatically improve safety in high risk environments, typically where heavy equipment, vehicles and humans interact.

Inspired by the saying, 'Where there is light, there is life', FHOSS keeps people safe by delivering solutions that materially impact their ability to see or be seen, and products which communicate essential information non-verbally.

Protecting; Property, Plant & People. **Preventing**; Accidents, Brand damage & Prosecution.

"Our **patented prismatic, Illuminated red is part of what sets us apart as market leaders**. This innovation allows you to stay constantly visible from up to a mile away whether or not there is a secondary light source".

- ISO 31000 & ISO 45001 compliance.
- Danger area identified giving advance warning to road users / pedestrians.
- Covering 360°.
- Hard wired into your vehicle or plant.
- IP68 rated (waterproof).
- Increases the safety / wellbeing of your employees & other road users.
- 50,000 hrs lifespan.
- Supporting Sections 33, 40 & Schedule 3a Health & Safety at Work Act 1974.

Testimonials

"This product is amazingly bright at night. Providing extra protection when working not only on the Highway, but on site in general."
- BAM Nuttall Ltd.

Pilot Tool van from Hanson now working in the Bedford area with one of Hanson Central Gangs. Great feedback from client and public. All new Hanson Contracting vans will come equipped with FHOSS Illuminated vehicle wrap.
- Hanson Contracting Ltd.

"It's looks very dramatic in darkness. When plant machinery is working at night, there is very little light to reflect back from standard prismatic material. This is where companies really benefit from FHOSS innovation as it does not require a secondary light source".
- Craig Flowers of Aggregate Industries.

"FHOSS Halo Exclusion is an innovation that enhances safety for very little additional cost. Those on-site will see the light and not walk across it. It reinforces the thumbs-up view for those working with and around, machinery."
- Dale - Plantforce

"We take safety very seriously, and we now have a total of 25 machines - wheeled and tracked - that are equipped with the Halo lighting system says. It is useful for night work of course, but it also has a value when working indoors on larger industrial building projects. Also when tunneling or in any area where ambient lighting is poor. We've also found the system to be really useful in winter, as it just adds that little bit of extra demarcation around kit before dawn and again, with an early sunset."
- Dan O'Brien of St Albans-based M O'Brien Plant Hire.

NANCE

FHOSS UNIVERSAL LIGHT® LIVERY

As a market leader of light based safety systems, FHOSS identified a simple solution to assist with people, vehicle and plant interface zones. FHOSS Light Livery panels increase the conspicuity of your fleet and provide essential additional visibility in low light and adverse conditions. They have been developed utilising passive light technology in order to draw attention to a vehicle without distracting or confusing other road users.

Temporary blindness is caused when we look directly into a light source. When we look away, a dark imprint is left in your sight for a few seconds that distorts your vision. This is called Scotomas. Passive light does not cause this and forms the basis of our Light Livery panels.

The panels can be set to either flash, steady glow or pulsate and are hard wired into your vehicle, draw little power and have a lifespan of 50,000+ hours. A specially developed coating provides a high level of protection to the panels which enable them to operate in inhospitable environments including quarries and building sites. As the special protective coating completely seals the panel, they are IP67 rated and can therefore be washed without fear of water ingress.

As well as the obvious safety benefits, there is the ability to increase brand awareness by illuminating a company logo or strap line. Light Livery can also be incorporated into signage and utilised as a directional or promotional aid. Our passion for safety has helped us to create lasting and effective partnerships with our clients who have used our safety systems on a variety of vehicles and high traffic areas.

CLOSE UP

We use our own FHOSS approved silicone to create a watertight seal between the Light Livery Panel and your vehicle. This process allows for simple, damage free installation resulting in a perfect fit and finish for every panel.

Our robust EVGA resin border and coating technology is built to ensure full IP67 protection against the elements. It also reinforces the structural integrity of the panel with proven cases of FHOSS Light Livery resisting significant impacts.

Our patented prismatic, Illuminated red is part of what sets us apart as market leaders. This innovation allows you to stay constantly visible from up to a mile away whether or not there is a secondary light source.

The illuminated panel combined with traditional reflective materials provides a host of additional safety benefits ensuring maximum visibility for you and your FHOSS Light Livery equipped vehicles.

CLOSE UP

We use a combination of both our unique ribbon connector technology and more traditional brackets to secure all FHOSS Panels to their respective vehicle.

This allows for an incredibly flexible range of options with connection placement, whether that's underneath the door, around a third party modification or between the doors.

Your FHOSS Approved Engineer will professionally wire the system into the vehicle when installing your Light Livery, this ensures familiarity for your operator and keeps the vehicle as simple to operate as before.

FHOSS UNIVERSAL LIGHT® LIVERY

UNIVERSAL LIVERY CONFIGURATIONS

With the typical sizes of commercial vans being so similar we are now offering a comprehensive range of generic livery configurations. We offer small medium and large panels across 2 different specifications, a single and 2 part system for each size option. With these new options FHOSS can outfit your entire fleet with ease.

	LARGE	MEDIUM	SMALL
SINGLE			
	1404mm x 170mm	1228mm x 170mm	1086mm x 170mm
2 PIECE			
	702mm x 170mm	615mm x 170mm	543mm x 170mm

FIRE & SAFETY REGULATIONS

- M1 = French NFP92 503-505 M1
- CE & EMC approved.

FAQs

Our dedicated team of safety specialists are on hand to answer any questions
And to offer advice on the best placement and usage of our safety systems.

We work closely with our partners and clients to ensure we are up to date with
The latest methods and working practices which means we are so much
More than just another supplier.

Q Does it work in the day?

A Yes and no. It is visible in low light / overcast conditions but not in bright light or direct sunlight.
For example a torch does not work in bright sunlight.

Q How durable is it?

A FHOSS Light Livery has been proven to withstand significant knocks from a hammer in testing as well as bumps in the workplace. Furthermore vehicles equipped with FHOSS Light Livery have been shown to reduce the likelihood of such accidents due to the driver's increased awareness.

Q Will it fit my vehicle?

A Most vehicles can be fitted as long as there is a power source to connect to.

Q Is it waterproof?

A Yes, the unit is IP67 rated.

FAQs

Q Can it be jetwashed?

A Yes but care should be taken to avoid prolonged spray directly to the body of the unit.

Q Can I move it onto a different vehicle?

A Yes although new cabling and conduit may be required depending on accessability and condition.

Q How is it powered?

A Hard wired into the vehicle or connects to AC/DC power supply.

Q Are there any other shapes available?

A We can fit FHOSS Light Livery to any vehicle or bespoke size.

Please note all panels over 1800mm must be sent as two seperate units.

Q Can it come on automatically or does it need a switch?

A It can do both depending on the required configuration.

Q Does it come in different colours?

A Yes, FHOSS Light Livery can illuminate any colour you would like except for black.

Q How long does it last?

A Up to 50,000 hours

Q Will it damage my vehicle?

A No. The FHOSS Light Livery panels require no drilling or damage to the vehicle as a silicone solution us used.

Q Is it road legal?

A FHOSS Light Livery is in keeping with all Chapter 8 requirements and is safe to be used with a red steady glow on public highways.

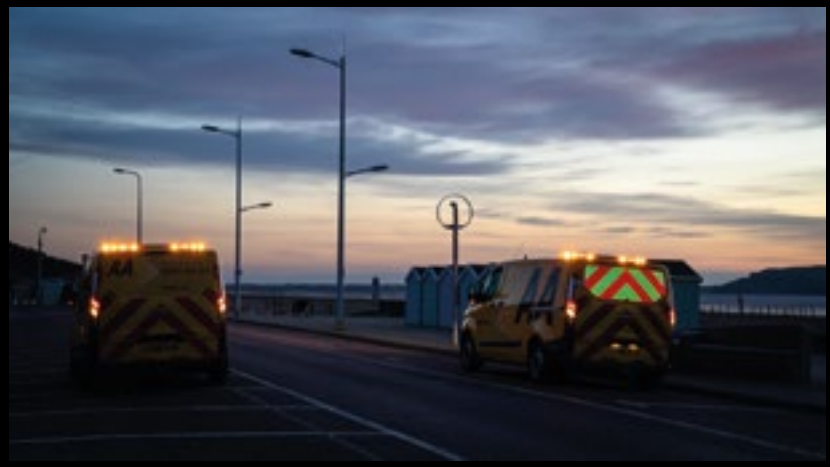
ORDER PROCESS

We work closely with our partners and clients to ensure we are up to date with the latest methods and working practices which means we are so much more than just another supplier.

Our dedicated team of safety specialists are on hand to answer any questions and to offer advice on the best placement and usage of our safety systems. Once we've agreed the right system for your requirements, we will arrange a mutually convenient time and location to fit your equipment.

Our highly skilled FHOSS engineers are fully trained and equipped to carry out your install with the minimum of fuss in a professional and timely manner. In the unlikely event of break down, installs and equipment are covered by a 12 month manufacturing defects warranty giving you complete peace of mind. If this does occur we will endeavour to get an engineer to you as soon as possible ensuring minimum downtime.

Please note that all prices include fitting on mainland Britain excluding some islands and highlands postcodes.



BESPOKE LIGHT LIVERY

FHOSS Light Livery is also available to your custom specifications. Any size*, shape or colour can be produced to suit your requirements. The addition of a company logo increases awareness, helps to stimulate conversation and increases the visibility of the vehicle to other road users.

With so many options available, why not give one of our safety specialists a call now to discuss your requirements;

+44(0)845 519 2725

enquiries@fhoss.com

Our worldwide patent ensures that our panels are the original and the best option for your light livery requirements. Inferior versions and immitations do not and cannot illuminate both the flourescent yellow and red sections of the panel.

Don't settle for second best, insist on FHOSS original equipment.
